PROTECT

This week's activities are all about appreciating the wildlife around us and thinking about what we can do to protect it. Get involved and share your experiences on social media!

MAKE YOURSELF AT HOME

AGES 8-11

Places that animals call home are everywhere, from bird nests up high, to rabbit holes down low.

What signs of life can you spot when you go for a walk, and how do the nests and dens you see protect the animals that live there?

➔ After your walk, try creating a model home for an animal of your choice? What comforts and protections would you give them and why?

MIND THE LITTERBUGS

AGES 4-7

Litter looks ugly and is bad news for wildlife, but unfortunately, it's hard to miss when you go out for a walk.

With rubber gloves, wet wipes and the help of a parent or carer, can you fill a carrier bag with the litter you come across on your walk?

➔ When you're done, dispose of the litter responsibly and work out what waste can be recycled and how!

Living Streets is the UK charity for everyday walking and the people behind the Walk to School campaign. Visit our website to find out more:

INDOOR CHALLENGE

Making a bird feeder is one of the simplest ways to support local wildlife, while also finding new uses for old rubbish. Using a plastic bottle, pencil, scissors, seeds and string, have a go at creating your own and hanging it outside your home.

➔ Look online if you need some tips, and don't forget to look out for new visitors!
