March 2020

Dear Parents and Carers,

Project Homework – March School Closure

As the school has been closed, we would not like the children to get bored during this unexpected time away from school. We have therefore moved forward the mid-term homework so that all pupils can continue to learn whilst being at home.

Year 3 pupils

The minimum expectation is for pupils to complete **at least one activity** from the list over the page (depending on the length of the school closure). If the children wish to complete additional work, such as the extension activity or the other projects, they can do so if they like. No PowerPoints on this occasion please. I have also added some maths homework via My Maths for the children to complete. Please log in regularly for the work.

Year 2 pupils

As well as the above activities Year 3 have been given (topic and My Maths), children from Year 2 will take home their CGP 10-minute tests booklets. This will support children to recap some important aspects from the curriculum. Pupils need to complete all tests in the booklets (sections A, B and C). Some of these have already been completed in school. These can be marked with the children as the answers are provided in the back of the booklets.

All of this work is set on top of the daily reading, spellings and multiplication tables practice. In my view, reading is reading. Therefore, once a child has finished their school reading scheme book, they are free to read books from home whilst they are unable to change them. This could also include comics and newspapers.

'Created by God to love and learn'

Class 2/3 school closure activities

1	<p>Science Research and label the parts of a flower. This should include labelling a flower and explaining the functions of each part. A comparison could be made between a flower and tree.</p>
2	<p>Topic To research Europe. This should include where Europe is located in the world, which countries make up Europe, the names and locations of major European capital cities and any famous European features such as mountain ranges and rivers. This could be presented as small fact-files about selected countries which could also include information about flags, population size, land size, spoken language etc.</p>
3	<p>Topic Create a holiday brochure for a country in Europe. This should include the major tourist attractions for the destination and include a 5-day itinerary of activities. Don't forget to include accommodation as you move around the country as well as places to eat. Alternatively, this could be done as a European tour across different countries.</p>
EXTENSION TASK	
4	<p>Topic Pupils to research and cook (if possible, depending on ingredients) a national dish from a European country. Include photos, a recipe and an evaluation of the dish.</p>

I hope you understand why this work has been provided and we trust you will support your child accordingly.

Mr Isaacs
